**Trusted Brand, Superior Quality, Luxurious Selection**

Over a century of authentic craftsmanship combined with advanced manufacturing innovations bring you the long-lasting, premier quality of Bruce® hardwood flooring.

Superior precision in the milling process and rigorous inspections featuring up to 75 checkpoints guarantee that each strip and plank of Bruce hardwood flooring has passed our highest quality standards.

With a wide assortment of colors, widths, species, specialty finishes, design styles and installation methods, Bruce makes it easy to find the perfect hardwood floor to complement your personal style and room décor.

Selection Made Simple
Features and Benefits that make Bruce®
Your Best Choice in Hardwood Flooring

Select the Right Construction

Solid Wood Floors
Made of 100% solid wood, traditional floors feature a 3/4” thick construction designed for nail-down* installation to wood subfloors in rooms on the first floor or above.

A New Dimension in Solid Durability
Bruce pioneered the development of a proprietary 5/16” thick, solid wood construction that can be glued down* over concrete and other hard surfaces, or stapled* to wood subfloors on the first floor or above. The low-profile construction also allows for smooth transitions to other rooms with different floor coverings, making it a perfect floor choice for remodeling. See our Natural Choice™ hardwood collection for more detailed information on Natural Choice 5/16” products.

Engineered Wood Floors
Engineered floors feature a 100% wood construction assembled in multiple layers. The wood layers are permanently bonded together in a cross-ply construction for superior strength and dimensional stability. This makes them suitable for installation in any room, even the basement. You can glue* them directly to concrete, staple* them to wood subfloors, or “float”* them above the subfloor with no direct attachment.

*Variations may apply. Consult our sales representative for additional installation applications.

Select the Right Look

A World Class Selection of Species
Page through this catalog to see the impressive collection of wood species available from Bruce. The natural wood characteristics of our domestic exotic species offer an abundance of eye-catching options that span all price points from standard to premium.

Color Variation
Wood is a natural material that features changes in color and tone. The board-to-board color variation is more pronounced in some species, less in others. As a natural material, wood reacts to ambient light over time. Selected exotic wood species will become darker and richer as the natural color in the floor is exposed to sunlight while other floors will lighten. The most dramatic changes will occur within the first six months following installation.

Surface Texture
From silky smooth to hand-scraped and distressed rustics, Bruce offers a variety of surface textures to accent your floor with a custom, hand-crafted look. Examples of these specialty treatments can be found in the Hand-scraped and Rustics sections of this catalog, pages 4-15.

Choice of Gloss Level
The gloss or radiance of your Bruce hardwood floor is available in a variety of luster levels. Low-gloss finishes help hide the appearance of minor surface scratches and wear. The color and texture in the floor is more pronounced in the standard Bruce finish that features a more radiant luster level. Gloss levels do not indicate product durability.
Select a Level of Performance

**Warranty: Residential Application**
Bruce® hardwood floors are protected by state-of-the-art finishes designed to preserve their natural wood beauty for years. If your active family is tough on floors, select our **BEST** high-performance finish that offers warranty protection for up to 25 years. Select **BEST** products feature Bruce Permion® finish for an even higher level of protection. Permion is so tough, it’s approved for the punishing demands of commercial application.

In less severe traffic and wear environments, the quality-crafted durability of Bruce hardwood floors protected by our **BETTER** rated 15- and 10-year finish will provide all the performance protection you need.

**Warranty: Commercial Application**
Our high-performance Permion finish is engineered to meet the punishing traffic wear demands of commercial applications. Permion finish products feature a 3-year Finish Warranty in Commercial applications and a 25-year Finish Warranty in Residential applications.

**Hardness**
The density/hardness of the wood species may also impact its wear performance. Strong, resilient Oak is used as the industry benchmark. When extra durability is important, consider a wood species as hard or harder than Oak as noted on our convenient hardness scales below.

Endless Possibilities

Who says a custom-designed floor has to be expensive? Not the designers, builders, remodelers and homeowners who have discovered the ease and endless design possibilities of Bruce® factory-finished floors. With over 200 colors and styles, it’s easy to create a floor with a custom-designed look at a fraction of the price. Mix different colors, styles and board widths to fashion a truly unique hardwood masterpiece.

Mixing Sizes
Mixing board widths is an easy way to stand out from the crowd. Consider these examples:

Inset Treatments
Create a border with several rows of one color or style to frame the inset. Let your imagination spark the inset treatment. Change the style, change the color, create new patterns... anything goes!

Custom Border Treatments
Introduce different colors or species to create a stylish border that makes a unique custom design statement.
Variety of Board Widths
Bruce® floors are manufactured in a variety of board widths from standard 2-1/4” wide strip floors to premium, extra-wide planks up to 7” wide. Slim, 2-1/4” strip floors create linear elegance that will visually help to expand the size of the room. The bolder 3” to 7” wide planks are a popular decorating choice to enhance larger rooms, and offer a casual installed visual.

Trim & Molding
Add the perfect finishing touch by complementing the look of your new floor with coordinating trim and molding available in a wide selection of matching colors and profiles.

Stylish Edge Treatments
The edges and ends of Bruce strip and plank floors are cut in a variety of treatments. Square cut edges and ends create a smooth, seamless appearance that emphasizes the overall look of the floor. Beveled edge treatments create a picture-frame effect that emphasizes the definition of individual planks and strips for added contrast and visual impact.
Easy Care
Maintenance & Finish Guide

Care & Cleaning

Superior craftsmanship and state-of-the-art finishes assure you will spend your time enjoying your new floor, not caring for it. Simple vacuuming and an occasional cleaning as needed with Bruce® Hardwood and Laminate Floor Cleaner will keep it looking like new.

Your Bruce hardwood retailer has everything you need for routine care and those occasional touch-ups. Ask for a copy of the Bruce Floor Care and Product Warranty Guide, or visit us at bruce.com

High-Performance Finishes

Dura-Luster® Plus
A product of advanced floor finish technology, Dura-Luster Plus provides outstanding durability and abrasion resistance. Featured on the majority of Bruce hardwood floors, this urethane finish with aluminum oxide crystals delivers all the performance needed to resist everyday traffic and wear, soil and spills.

Dura-Luster Finish
A beautiful, crystal clear finish. Multiple layers of ultraviolet-cured urethane resins form a hard traffic- and wear-resistant barrier that also protects the wood from soil and stains.

Permion® Finish
When normal wear is the exception, the Permion Finish provides an extra measure of durability. It features an extra-hard urethane coating with aluminum-oxide technology to protect the floor in extreme traffic and wear conditions. It's so tough, it is approved for the extra demands of commercial application.

Floor Finish Guide
The product guide on pages 56-57 details the specific finish system for every Bruce product.

Wood is a natural material containing distinctive differences in color and grain configurations. It is these differences, caused by nature, that create the warmth, beauty and originality of each hardwood floor. The printed room scenes and color swatches in this brochure are intended as a visual guide, not as an actual color or grain pattern representation of the flooring itself.

Fiber used in this product line meets the sourcing requirements of the SFI program. www.aboutsfi.org
